OBJECTIVE

I am a recent CS graduate seeking opportunities in software development. I aim to leverage my software engineering skills to solve complex challenges and create impactful solutions.

EDUCATION

Bachelor of Science in Computer Science, California State University Chico 2020 – 2024

SKILLS

Technical Skills: C++/C, Python, Bash, React, JS, CSS, HTML5, Docker, Linux, SQL, MongoDB, Google Cloud, Bootstrap, Django, Assembly Language, Swift, Scripting, Git, GitLab, Vercel, Windows10, VMware, Virtual Box, Wireshark, Kali Linux, DB Browser

Languages: Spanish (Native), English (Native)

EXPERIENCE

Assistant Programmer Jan. 2022 – Dec 2022
CSU Chico Chico, California

- Developed a fully functional password generator using true randomness for secure password creation
- Created tutorial videos explaining key programming concepts such as OOP, pointers, and other key topics to assist fellow students.

Assistant Soccer Coach Jan. 2017 – March 2020
Kidz Love Soccer N. American Youth Group San Jose, California

- Organized and set up training session for children of various ages
- Instructed players on rules and techniques while fostering teamwork and sportsmanship
- Communicated event updates and changes with parents and guardians

Cyber Security Mentee Nov. 2023 – Feb. 2024
CrowdStrike and National Cyber League California

- Analyzed compromised machine images to find tampered files, attack, and malicious tools.
- Used forensic tools to trace hacker activity and document finds.
- Completed the investigation ahead of schedule, collaborated with CrowdStrike professionals to refine the analysis.

PROJECTS

Spotify, YouTube Player (SYP):

- Developed a web app enabling a multi-platform music search and playlist management
- Implemented OAuth authentication, and API integrations for seamless Spotify and YouTube access.
- Built using ReactJS, CSS, HTML, Bootstrap, Docker, MongoDB, and Google OAuth

Read IT:

- Created a browser extension that reads text aloud
- Expanding functionality to include AI-driven recommendations
- Built using ReactJS, OpenAI API, Google Cloud
